For Brilliant, Sparkling Pool Water!

•
**Improves Filter Performance
& Efficiency**

•
Formulated for Smaller Pools

NET CONTENTS
32 FL. OZ (946 ml)

Shimmer has proven to be a superior water clarifier in swimming pools, spas, fountains, and water parks.

CLARIFIES CLOUDY WATER

Shimmer coagulates the tiny particles and oily liquids that build up in your water so your filter can remove them. But unlike single-purpose clarifiers, this product does a whole lot more than just make your water look clean.

HELPS REMOVE METALS

Like millions of microscopic magnets, Shimmer gathers stain-causing metals like iron, copper, zinc and manganese and deposits them in your filter where they stay until you flush them out.

ELIMINATES OIL & SCUM LINES

Shimmer takes the water-dulling soaps and oils out of your water but will not deposit them on surfaces like other brands do.

IMPROVES FILTER EFFICIENCY

Any filter will leave a certain amount of unwanted material in your water. Shimmer allows your filter to trap these impurities and hold them without clogging. How? The molecular structure of our biopolymer keeps it and the impurities it holds on the filter media, and not in the spaces that your water passes through. So your filter can actually run longer between cleanings.

DIRECTIONS FOR USE

Always backwash your filter before adding Shimmer Clarifier. Add the required amount of Shimmer to a plastic watering can, fill with water, and add to the pool at the point of maximum agitation. Run the pool filter for at least 8 hours after adding Shimmer, then vacuum any residue. It is safe to swim immediately after treatment with Shimmer.

Maintenance Dosage: For a shimmering pool all season long, add 2 ounces of Shimmer per 5,000 gallons of swimming pool water. Continue treatments on a weekly basis.

Pool Opening Dosage: If pool water is extremely cloudy or turbid, add 4 ounces per 5,000 gallons of water and run the filter longer than the standard 8 hours mentioned above.

Our guarantee is simple: Shimmer works better than any other clarifier you've tried or your money back.

SHIMMER WILL NOT HARM PLANTS OR ANIMALS. USE IT REGULARLY TO KEEP YOUR WATER BRIGHT AND SPARKLING CLEAR. USE ONLY AS DIRECTED. EXTREMELY SLIPPERY IF SPILLED. BLUE WAVE PRODUCTS IS NOT LIABLE IF PRODUCT IS MISUSED.
