**DANGER:** See additional precautions and  
 first aid on back panel.

**Clears up Cloudy Water FAST!**

**Drops Debris to Bottom for  
 Easy Vacuuming**

**Perfect for Spring Start-Up**

**NET CONTENTS**  
**32 FL. OZ (946 ml)**

## GENERAL INFORMATION

This product will effectively flocculate organic and inorganic particles suspended in swimming pool water. The pH must be 7.2 or higher for this product to work.

## DIRECTIONS

Test pool water pH with a reliable test kit, adjust pH to 7.2 or greater if necessary.

For highly turbid pool water, dispense approximately 1 quart (32 ounces) of this product per 40,000 gallons of water evenly over the water surface. Allow the pump to run for approximately one hour, then shut off.

Allow the floc to settle to the bottom of the pool overnight and then vacuum it out, to waste.

This product may be used as part of weekly pool maintenance to prevent the pool water from becoming cloudy or turbid. Apply eight ounces of this product per 40,000 gallons of pool water directly into the skimmer or around the pool perimeter while the circulation system is in operation.

## FIRST AID - PRACTICAL TREATMENT

**EYE CONTACT:** Immediately flush with large quantities of water for at least 15 minutes. Seek medical attention.

**SKIN CONTACT:** Flush affected area with clear water, wash with warm soapy water.

**IF SWALLOWED: DO NOT INDUCE VOMITING.** Obtain medical attention or advice.
