

Black Pantone 248 Pantone 322

This liquid filter cleaner greatly improves filter life and efficiency. It is specially made to cleanse suntan oil, and grease as well as scale and mineral deposits from spa filters of all types: cartridge, sand, and D.E. Regular use of this product will assure proper filtration.

DIRECTIONS FOR USE

When preparing or using this product, take care not to splash, drip, or use on surfaces such as ceramic tile, linoleum, Formica brand counter surfaces, carpeting, etc. as etching or discoloration of these surfaces may take place. This product is intended only for use as a spa filter cleaner.

CARTRIDGE FILTERS AND FILTERS WITH REMOVABLE ELEMENTS:

Mix 8 ounces of this product per 1.25 gallons of clean water in a large plastic bucket. Make only enough solution to cover the elements. (Never use a metal container with this product.) Always add this product to water; do not add water to this product.

Remove filter cartridge or diatomaceous earth (DE) elements. Rinse with clean water. Place cartridges or elements into the solution and soak 10 to 12 hours. Remove cartridges and rinse thoroughly with clean water. Cartridges should dry before being reinserted in the filter. (It's often a good idea to have a spare clean cartridge on hand to avoid downtime.)

SAND FILTERS AND FILTERS WITH NON-REMOVABLE ELEMENTS:

Mix 8 ounces of this product per 1.25 gallons of clean water in a plastic bucket. Make only enough solution to cover filter media. Backwash filter. Shut off pump and drain filter. Remove debris from lint pot. Leave handle in the backwash position and pour cleaning solution into the lint pot while the pump is running. Never permit your pump to run dry. Continue to add the solution until the sand or filter elements are completely covered. Shut off pump and allow solution to remain in the filter for 10 to 12 hours. Backwash the filter until water exiting backwash line is clear. Restart pump and refill filter with clean water.

WARNING

KEEP OUT OF REACH OF CHILDREN

This product contains sulfuric acid and hydrochloric acid. Irritant to eyes and mucous membranes. Avoid contact with skin, eyes, or clothing. Harmful if swallowed. Do not inhale or swallow. Do not mix with chlorine-type bleaches or other household chemicals.

FIRST AID

EYE CONTACT: Flush thoroughly with plenty of water for at least 15 minutes. Get prompt medical attention.

IF SWALLOWED: DO NOT INDUCE VOMITING. If conscious, give 1 to 2 glasses of water and call a physician immediately. Never give anything by mouth to an unconscious victim.

SKIN CONTACT: Flush area with plenty of water, then wash with soap and water. If irritation persists, get medical attention. Remove and wash clothing before reuse.
