

Black Pantone 248 Pantone 322

16 oz. \_\_\_\_\_

This product represents the latest generation in water clarification. Spa owners will find filters last longer and operate better.

This product is a cationic polymeric flocculent that will coagulate and floc suspended particles from spa water, while adding no solid residues of its own. The floc that is formed may readily be filtered from the water by conventional filtering systems.

It is not necessary to adjust pH of the spa water before or after using this product. The performance of this clarifier is not affected by chlorine.

**DIRECTIONS**

Shake lightly before using.

Add 4 ounces of this product per 500 gallons of water for initial treatment. For weekly maintenance, add 2 ounces per 500 gallons of water. For either treatment, sprinkle dosage evenly over entire water surface while water is circulating.

Continue to circulate for 30 to 45 minutes.

**NOTE:** Be sure to follow directions. Do not overapply as that may hinder the product's effectiveness.

**CAUTION**

This product may be irritating to eyes. In case of contact, flush thoroughly with cool water for 15 minutes. If irritation develops, call a physician.

**DISPOSAL**

Do not reuse empty bottle. Wrap bottle and put in trash collection.
